Est-Nord-Est is an artist-run centre which offers, through its residency program, technical support and a critical context to artists engaged in the process of research/creation. Three residencies are offered per year, in the spring, summer and fall. Up to four artists and a curator or a writer may participate in each residence. Founded originally on the idea of offering to contemporary sculptors a context to work and exchange in contact with a unique traditional savoir-faire, Est-Nord-Est today welcomes artists from all over the world involved in all disciplines and practices associated with current visual art.
